CAREER OBJECTIVE

I am a dedicated and passionate **MERN Stack Developer** with hands-on experience designing and building responsive, scalable, full-stack web applications using **MongoDB, Express.js, React.js, and Node.js**. I am committed to writing clean, efficient, and maintainable code that solves real-world problems and delivers seamless user experiences. My goal is to secure a challenging developer role at a forward-thinking organization where I can apply my technical expertise, contribute meaningfully to impactful products, and grow into a well-rounded software engineer.

SKILLS

Languages & Markup: JavaScript (ES6+), HTML5, CSS3

Frontend Development: React.js, Tailwind CSS, DaisyUI, Bootstrap, React Router, Context API

Backend Development: Node.js, Express.js, REST API Design, JWT Authentication, Middleware

Database & Cloud: MongoDB, Mongoose ODM, Firebase Authentication, Firebase Storage

Tools & Platforms: Git, GitHub, VS Code, Postman, Vercel, npm, Chrome DevTools

Soft Skills: Team Collaboration • Problem Solving • Fast Learner • Attention to Detail • Communication

PROJECTS

InvestProp AI — *AI-Powered Real Estate Platform* [Live Link](#) | [GitHub](#)

- Built an AI-driven property recommendation engine that analyzes market trends and user preferences to surface high-potential real estate investment opportunities.
- Implemented secure role-based authentication (Investor / Admin) using Firebase Auth and JWT, with fully protected private dashboard routes for authorized users only.
- Developed dynamic property listing pages with advanced filtering, sorting, and real-time data fetching powered by a RESTful API built on Node.js and Express.js.

Tech Stack: React.js • Tailwind CSS • Node.js • Express.js • MongoDB • Firebase • JWT • Vercel

Job Finder — *Full-Stack Job Board Application* [Live Link](#) | [GitHub](#)

- Designed a full-featured job portal enabling employers to post and manage listings while candidates can browse, filter by role or location, and submit applications — all in one seamless platform.
- Integrated JWT-based authentication with protected routes ensuring only verified employers manage listings and only authenticated job seekers can apply, maintaining data integrity.
- Built a real-time applicant tracking dashboard where employers can review, shortlist, and update the status of received applications, streamlining the hiring workflow.

Tech Stack: React.js • Tailwind CSS • Node.js • Express.js • MongoDB • JWT • Firebase Auth • Vercel

Pet Adoption Platform — *Community-Driven Adoption Website* [Live Link](#) | [GitHub](#)

- Created an end-to-end pet adoption platform connecting pet owners with adopters, featuring comprehensive pet listings, adoption request submissions, and an admin approval workflow.
- Built a powerful admin dashboard with full CRUD operations over pet profiles, user account management, and real-time adoption request status tracking and updates.
- Delivered a responsive, mobile-first UI with Firebase Storage for image uploads and smooth client-side navigation built with React Router for an optimized browsing experience.

Tech Stack: React.js • Tailwind CSS • DaisyUI • Node.js • Express.js • MongoDB • Firebase • Vercel

EDUCATION

Higher Secondary Certificate (HSC) — Science Group | 2nd Year — Currently Ongoing

Secondary School Certificate (SSC) — Science | Rowmari High School | GPA: **4.50 out of 5.00**

LANGUAGE PROFICIENCY

Bengali — Native / Fluent **English** — Intermediate (Reading, Writing & Communication)
